108 Vehicle Rescue

This class is designed for the first responder that wants to take their rescue skills to the next level! This hybrid class of auto extrication and heavy vehicle rescue will provide the student with the knowledge and skills to mitigate vehicle stabilization and extrication encounters from simple to complex. This intensive 3-day course will challenge you to work individually and in teams to respond to increasingly complex rescue scenarios. The auto extrication portion of the class will cover stabilization including basic wood cribbing, struts and other methods; the heavy rescue portion of the class will cover car/truck under ride, commercial trucks, busses, and heavy lifting. This hands-on training course is physically demanding.

PRE-REQUISITES/EQUIPMENT NEEDED

3-years' experience with rescue techniques and tools.

Helmet, gloves, jumpsuit or turnout gear, fire/rescue footwear and safety glasses. No SCBA is required.

Special thanks to Robert's Towing for their support of this course!

This course will be held off-site.

This 3-day course will be offered Thursday-Saturday.

Lead Instructor: David Walters, State Fire Rescue Training District 5
