

ANHYDROUS AMMONIA TRAILER

LOCATION

Area 3 Training Center
Calhoun, KY

SPECIFICATIONS:

Length	22'
Width	6 ½'
Height	6'
Weight	NA

OBJECTIVES

This trailer has a mission of providing responders about the hazards of Anhydrous Ammonia. It will provide the responder with the familiarization of the transport vehicle for Anhydrous Ammonia.

CAPABILITIES

This trailer is a bumper pulled trailer with a 2 5/16" ball hitch. The tank on the trailer has three cut-away ports to allow the responders to understand the valving and plumbing that is used on the Anhydrous Transport tank. This unit enhances the classroom lecture presented by the Area 3 staff dealing with Anhydrous Ammonia Emergencies.
