

VENTILATION TRAILER

LOCATION

SFRT Area 2
Princeton, KY

SPECIFICATIONS:

| | |
|--------|-----------|
| Length | 25' |
| Width | 8' 6" |
| Height | 10' |
| Weight | 8,000 lbs |

OBJECTIVES

This 'Ventilation Trailer' has the mission of training firefighters the procedures for ventilating a pitched roof.

CAPABILITIES

This trailer has a 'Shingled Roof' on the rear side and a 'Metal Roof' of the front side. Each roof has a section designed to replace an insert for the purpose of chopping or cutting, thus simulating a ventilation scenario. There is an insert below the ventilation area where a piece of drywall board may be installed to allow the firefighter to take a pike pole or other tool and 'knock' the ceiling out from the roof. The trailer carries a roof ladder to allow the firefighter to work on the prop as they would in a real life situation.
