**5. The Fireground Blueprint: Tactical Risks, Reading the Building and Modern Size-up on Today's Fireground**

Instructor: Christopher Naum

Arriving companies and personnel at today's structure fires must be able to rapidly and accurately identify key elements of the fireground, process that data based upon a widening field of variables present on today's evolving fireground and consider timely actions that address prioritized actions requiring intervention. This session will present tactical risks and key considerations for the First-Due Company, Company Officer and Commander affecting and influencing operational risk management, command and tactical safety and tactical protocols**.** Incorporating the Buildingsonfire FACTS concept for First-Arriving Construction, Tactics and Safety, with a focus on the Residential Structure (traditional and modern), The Small Foot-print Commercial Structure and the Main Street Buildings common throughout the state and region.

**About the instructor:**

**Christopher Naum** is a 50-year fire service veteran and a highly regarded national and international instructor, author, lecturer and fire officer, a distinguished authority on building construction sciences affecting fireground operations, command and tactics, he has traveled extensively throughout the USA and globally delivering training programs on building construction & architecture sciences and firefighting, fireground leadership, command management and operational safety for over thirty-seven years.
